

## Miratlas achieve EN9100 and ISO9001 Certifications: A major recognition of its commitment to quality and continuous improvement processes

**PERTUIS-France, November 28, 2024,** Miratlas is proud to announce that it has achieved EN9100 and ISO9001 certifications, awarded by OSAC. These recognitions attest to the compliance of our management system with the most demanding international standards in terms of quality and performance.

### Dual Certification in Service of Excellence

The EN9100 standard, specific to the aerospace industry, demonstrates our commitment to upholding the highest standards in our activities. It ensures the rigor and efficiency of our processes, a critical asset to meet the expectations of our partners and clients in this strategic sector.

The ISO9001 certification, on the other hand, confirms that our quality management systems are optimized to deliver reliable services that meet international requirements, regardless of the industry.

### A Responsible and Transparent Approach

Quality is a fundamental pillar of our strategy. Achieving these certifications reflects our unwavering commitment to continuous improvement and customer satisfaction.

This commitment is guided by our quality policy, which focuses on three key steps: qualifying, producing, and selling measurement instruments; deploying a network of instruments to deliver atmospheric data as a service; and leveraging this atmospheric database to provide forecasting and atmospheric modelling services.

To achieve these objectives, Miratlas concentrates on providing value and ensuring customer satisfaction, maintaining an efficient and sustainable work environment for our teams, and taking an active and positive role within the space ecosystem alongside our suppliers and partners.

### A Key Step for the Future

This dual certification strengthens our position as a trusted player in the industry and highlights our ability to operate with excellence in a demanding environment. It opens new avenues for collaboration with partners who share our values of integrity, performance, and innovation.
